

CLAIMS

1. A system for application software development on mobile devices comprising;
a mobile device having a microprocessor and a memory;
means for downloading mobile device applications into the memory;
software programming means operable in the microprocessor for enabling development of further
5 device applications and transfer of the further device applications into the memory; and
means in the mobile device for enabling operation of the device applications in the mobile device.
2. The system of claim 1 wherein the mobile device comprises a cellular phone.
3. The system of claim 2 wherein the mobile device includes a PDA.
4. The system of claim 1 wherein the software programming means comprises a MIDlet
10 programming language.
5. The system of claim 4 wherein the means for downloading includes a means for
converting Phai Script language to embedded code.
